

# FIND YOUR *Perfect* FOUNDATION

It's important to find the right shade in your foundation to ensure that you're comfortable wearing it and that you always look your best.

Before looking at the different shades available, it's best to take a really good look at your skin in natural daylight and note down the colouring to your skin and any undertones that show. It's also good to look at the veins on the inside of your wrists as the colour of these may help determine your skin-tone too.

YOUR UNDERTONES ARE	IF THE COLOURING/TONE TO YOUR SKIN IS..
<b>NEUTRAL</b>	Balanced, no obvious pink, peach or yellow to the skin and veins are greeny-blue.
<b>COOL</b>	Pinky tones to the skin and veins are more likely to be blue.
<b>WARM</b>	Peachy tones to the skin and veins are more likely to be green.
<b>OLIVE</b>	Yellow tones to the skin and veins are more likely to be green.

WHICH FOUNDATION TO TRY?					
UNDERTONES	NEUTRAL	COOL	WARM	OLIVE	CONCEALER TO MATCH
